CONSINEE was founded in 1999 to redefine the meaning of luxury yarns for fashion, placing cashmere at the heart of the collection.

Our continual investment in technologies and expertise for processing, dyeing and spinning, along with our creative colour and yarn innovations, has made CONSINEE a global market leader supplying over 20% of the worlds cashmere.

With a continually expanding collection of premium natural fibre yarns we offer a versatile and flexible fully stock supported range ready for immediate delivery.

Our pioneering vision created the worlds first fully automated unmanned AI cashmere spinning factory, increasing excellence and reducing waste.

CONSINEE is now a name that has become synonymous with luxury innovation, excellence and supreme sustainable quality.

TRUE COMMITMENT TO ENVIRONMENTAL PROTECTION AND ANIMAL WELFARE

Our partnership with suppliers and dedication to new manufacturing techniques has earned us a wide range of certifications to reassure you of our unrivalled quality control and belief in sustainable initiatives.

CONSINEE has always placed great importance and emphasis on being ethical and socially responsible, with a true commitment to environmental protection, animal welfare and sustainability. We believe in total transparency from the provenance of raw fibre to the complete production process and offering full traceability back to the farms for all our natural fibres.

Leaders in Luxury

The Good Cashmere Standard

We are proud to be awarded the Good Cashmere Standard. This certification stands for sustainably sourced cashmere from farms where goats are treated responsibly, the environment is protected, and the social, ecological, and economic living conditions of cashmere farmers and their families are respected.

The Good Cashmere Standard® is an initiative of the Aid by Trade Foundation with the aim of creating, promoting and implementing a benchmark standard for sustainable cashmere.

The Standard incorporates the Five Freedoms as defined by the Farm Animal Welfare Council. The Good Cashmere Standard follows three main principles: promote animal welfare in cashmere production, support cashmere farmers to secure a sustainable source of income and protect the environment.

The Sustainable Fibre Alliance (SFA)

The Sustainable Fibre Alliance (SFA) is a non-profit international organisation working with the extended cashmere supply chain, from herders to retailers. Their goal is to promote a global sustainability standard for cashmere production in order to preserve and restore grasslands, ensure animal welfare and secure livelihoods.

Responsible Wool Standard (RWS)

RWS certification ensures that the wool comes from farms with a progressive approach to managing their land and treat their sheep responsibly. The goals of the RWS are to provide a tool to recognise the best practices of farmers to ensure wool comes from farms that uphold the highest environmental, ethical and socially responsible standards.

We Like to Listen

Our customer commitment means we like to listen and react to your individual needs, please do not hesitate to contact us at:

info@consinee.com.cn

and we will be more than happy to help.

HESTIA

Hestia
2/26nm 70% Mercerized Wool 30% Cashmere
Stock Supported

Hestia Felt
2/26nm 70% Extrafine Merino Wool 30% Cashmere
Stock Supported

At CONSINEE we use only the very best premium natural fibres in our all our yarns, with cashmere the core of our collection. The luxury, beauty and exceptional warmth of cashmere is unrivalled and immediately recognizable due to its' unique qualities of lustre, lightness, durability and softness creating a superior elegance for knitwear.

We value tradition and heritage very highly, working closely in partnership with experienced goat herders, whilst also embracing innovation using modern dyeing and manufacturing processes to create exceptional colours, effects and weights with all our yarns.

HESTIA blends our renowned luxury cashmere fibre with ultrafine micron wool top. Expertly spun to 2/26nm to create a supersoft, lofty and versatile yarn in a wide range of stock supported colours.

HESTIA FELT has been developed to add a wool cashmere yarn with a extra dimension and compact warmth to our collection to be able to create more jacket, coatigan and semi- tailored knits. Using additional washing techniques and adjusting the knitting process through tension and stitch structures Hestia Felt achieves a felted look that remains supremely soft, offering warmth combined with luxurious comfort.

Hestia minimum order quantities:
Stock supported shades 1kg per colour
Non-stock supported yarn dyed shades 5kgs per colour
Non-stock supported top dyed solid and mélange shades 20kgs per colour.

Hestia Felt minimum order quantities:
Stock supported shades 1kg per colour
Non-stock supported top dyed solid and mélange shades 20kgs per colour.

Scan the code to learn more about HESTIA

Our customer commitment means we like to listen and react to your individual needs, if you are looking for your own unique blends, counts or colours or simply want more information please do not hesitate to contact us at info@consinee.com.cn and we will be more than happy to help.

Please see below the list of our wide range of stock supported qualities in our collection with a minimum order of 1kg per colour. All bespoke orders for top dyed solid and mélange shades carry minimums of 20-60kgs per colour.

ATTENTION:

The rewinding operation must be carried out with certain machines and particular attention; therefore we advise not to rewind, unless absolutely necessary.

The following recommendation is based on a rotary finishing machine. Water temperature: 40°C Liquor ratio: 20:1 (20 Litres of water for every kilogram of garments)

CARE INSTRUCTIONS:

  Hand Wash or Dry Clean

 Do not bleach

 Dry flat, do not tumble dry

 Iron at a cool setting

RECOMMENDED FINISHING

A two bath method, using a designated detergent, will give the optimum handle. The first bath is designed to remove the spinning oil and residual dyestuffs and the second to mill the garments to the required handle.

Bath 1:

- 5-10% of non-ionic detergent based on weight of goods
- Run for 3 minutes
- Drain and rinse

Bath 2:

- 2-5% detergent, based on weight of goods
- Run for 3 minutes, depending on the handle required. For a softer handle extend the time in this bath
- Drain and rinse
- 1.5% Softener maximum. Run for 10-15 minutes
- Standard tumble dry 70-80°C (60°C for light shades), until dry. Do not over dry
