現在全球越來越重視環境保護，可持續發展概念亦同時影響了紡織行業。再生羊絨因而衍生可再生羊絨其實是羊絨纖維的回收再使用，當中分為：

- 1.消費前廢料 Pre-consumer，當中包括紡紗過程中產生回絲回毛再次回收重新做紗線。
- 2.消費後廢料 Post-consumer，即以做成衣服而回收再用。

為減少或消除其生產造成的危害，讓零售商和消費者瞭解特定產品的那些部分是再生材料，我理想實現可再生羊絨的產品，所以現在我司通過混紡的形式，開發了混紡羊毛、羊絨等纖維，這樣就可以達到一個取中的效果。

而可再生羊絨並不會比普通羊絨便宜，因為可再生並不代表低廉，相反，可再生羊絨、羊毛在重複利用的過程中會比新生羊絨、羊毛更難操作，為了提高製成率，其對紡紗工藝要求更高。

2/26NM 60%可再生羊絨40%羊絨，適合12針機織，這款產品的優點就是柔軟，並且60%的可再生羊絨的比例相對來說已經非常高了，既平衡了羊絨的柔軟度，又實現了對可再生羊絨的利用。

可再生羊絨其實是一種信念，是一種使命，是人類為了大自然所做的妥協。倡導可再生能源是我們每個人需要去做的，並身體力行的。

Now the environmental protection has been taken more and more attention globally, and the concept of sustainable development also has influence on the textile industry, thus, the recycled cashmere derived.

Recycled cashmere is actually the recycling and reutilization of cashmere fibers, and which are divided into:

1. Pre-consumer, this includes the fiber wastes generated during the spinning process, and then recycles and remakes into yarns
2. Post-consumer, this is to recycled the finished sweaters and reuse.

In order to reduce and eliminate the harm caused by its production, and let retailers and consumers understand which parts of a specific product are made of recycled materials, our company has developed the blends of recycled cashmere with regular cashmere and wool fibers so that we can achieve the balance on quality and performance.

Recycled cashmere is not having the price lower than regular cashmere because recycle is not equal to cheap. On the contrary, recycled cashmere or wool is more difficult to handle during spinning process comparing new cashmere or wool, which needs higher requirements on the spinning workmanship to reach the proper yield.

2/26NM 60% recycled cashmere 40% cashmere, is suitable for 12gg knitting. The advantage of this product is soft and the proportion of 60% recycled cashmere is relatively high, which balances the softness of cashmere and the realization of the use of recycled cashmere.

Recycled cashmere is actually a belief, a mission, and a compromise made by mankind for nature. Advocating recycled energy is what each of us needs to do and practice.

WASHING RECIPE

Wash with detergent and fluffy agent for 17 mins.
Soak for 30 mins then rinse and drain.
Soak for 20 mins more with softener and silicon oil, then drain.
Dry 25 min at 90°C ,cool drying for 5mins.

Note: The above washing process is for reference only, and needs to be adjusted according to different washing equipment and conditions. And there are many factors in the washing process, so pls arrange self-testing if necessary.

CARE INSTRUCTIONS

- Hand wash cold separately
- Do not bleach
- Lay flat to dry
- Cold iron
- Dry cleaning

建議洗水方案

機油和膨鬆劑洗17分鐘,浸30分鐘,過清水,脫水,
加平滑劑和硅油浸泡20分鐘,脫水,用90°C烘乾25分鐘,打冷風5分鐘。

說明：
以上洗水工藝僅供參考，需要根據不同的洗水設備和條件進行調整。
而且在加工過程中有許多影響因素，因此不排除自行試驗的必要性。

洗水標籤

- 單獨用冷水手洗
- 不可漂白
- 平放晾乾
- 低溫熨燙
- 乾洗

INDEX

溫馨提示：
Friendly Reminder :

- 我們可以為客人度身訂做他們的顏色,但首先請與我們的銷售團隊聯繫,並非所有顏色都能適合回收羊絨。回收羊絨可能無法使用某些顏色,如熒光色,鮮明或柔和的顏色。
M.ORO can tailor-made Customer's own color but need to check with our Sales team first, not all the colors can be do for recycled cashmere. Like Fluorescence color, some bright or pastel color might not workable on recycled cashmere.
- 回收羊絨的起球等級可能無法保證。
Pilling grade might not guaranteed for recycled cashmere.
- 質量可能會有所不同。
Quality is subject to variation.
