TAIGA ECO
KALAHARI ECO
PACIFICO ECO
AION ECO
TIBERIO ECO
SATORI+

AERIS

This collection explores a lighter, more refined expression of winter—where warmth is carried not through weight, but through precision and air. Built around fine gauge constructions and carefully balanced fibre blends, these yarns offer clarity, fluidity, and a quiet sense of movement across the surface. Inspired by **Aeris** — the invisible presence of air—each yarn holds a subtle tension between lightness and structure, allowing fabrics to breathe while maintaining depth and integrity.

Taiga ECO is spun from a unique blend of RWS wool, TENCEL™ Lyocell (Counterbalanced Carbon Emissions), recycled polyester, and a touch of nylon, this yarn has an impalpable, luxurious hand feel. Taiga ECO is a yarn with exceptional versatility, making it an ideal choice for creating cozy yet sophisticated knitwear with an effortless, relaxed elegance.

Kalahari ECO is spun from a blend of premium RWS wool, TENCEL™ Lyocell (Counterbalanced Carbon Emissions), recycled polyester, and a touch of nylon and Lycra®. This unique yarn offers a dry, yet light hand feel, making it the perfect choice for creating casual and elegant transseasonal knitwear. The exceptional quality of the fibres, combined with its construction, results in a yarn that exudes a sophisticated, yet relaxed aesthetic. Kalahari ECO is designed to seamlessly transition between seasons, allowing you to craft versatile garments that can be effortlessly layered and worn throughout the year.

Pacifico ECO's unique fibre mix creates a yarn with a fluid and comfortable handle, ideal for casual and sporty knits. This yarn features recycled polyester from REPREEVE® Our Ocean®, a special fibre derived from post consumer plastic bottles at high risk of entering the ocean.

Aion ECO is a versatile new yarn that combines the finest RWS extrafine merino wool with Viscose (LENZING™ ECOVERO™) , a sustainable viscose fibre, and a touch of recycled nylon. This lightweight yet durable blend is an ideal choice for creating warm, breathable knitwear with a soft, comfortable hand feel.

Tiberio ECO is spun from a luxurious blend of RWS extrafine merino wool and cotton with a touch of recycled nylon, making it the perfect yarn for creating lightweight yet durable knitwear with a soft, comfortable feel.

Satori⁺'s appearance is very light to the touch, with a delicate sponginess. Spun from top quality RWS merino wool, Satori⁺ is the ideal yarn for your winter basics or to add crisp stitch details and textures to your knitwear collection.
