SHAUN⁺

FJORD ECO

RYELAND⁺

BOREAL

This collection takes its name from **Boreal** — a landscape shaped by cold light, soft air, and quiet depth. Here, form is never sharp, but gently diffused, and warmth is held through lightness rather than weight.

Built around lofty constructions and refined fibre blends, these yarns create soft, irregular surfaces that feel both expansive and intimate, balancing volume with a subtle sense of ease.

Shaun ECO is quickly becoming one of our favourite carry over qualities for the season. A luxurious blend of mohair and RWS wool, this yarn produces a voluminous, lofty fabric that is perfect for creating statement knitwear pieces with a captivating, handcrafted aesthetic.

Shaun⁺ is a more sustainable option using RMS mohair. Minimum order quantities apply for this article.

This season, we introduce **Fjord ECO**. Inspired by glacial landscapes, its textured surface carries a natural depth and quiet movement, lending itself to sculptural knitwear with a soft, effortless presence.

Ryeland⁺'s unique irregular appearance is perfect for cosy, oversized knitwear items to snuggle up in the coldest days. Ryeland⁺ is spun from top quality RWS extrafine merino wool with a touch of recycled nylon.
