YULUNGA ECO

LUMINA

This collection takes its name from **Lumina** — a celebration of light in its many forms. Just as light shifts, reflects, and refracts into a spectrum of tones, these yarns bring together colour, texture, and movement to create surfaces that feel lively, layered, and full of energy. Each construction reveals a different expression of this interplay, where tones emerge, overlap, and softly transform across the fabric.

Spun from refined blends of wool and cotton, these yarns balance softness with clarity, allowing colour to sit lightly on the surface while retaining depth and character. The result is a collection that feels vibrant yet composed, offering a dynamic approach to winter knitwear.

This season, we introduce **Twine+** and **Trama ECO**.

Inspired by the twisting of fibres, **Twine+** expresses cohesion through a softly marled surface and visible ply, creating knitwear with a sense of gentle movement and warmth.

Trama ECO, named after the structural thread within a textile, reveals a more open, linear construction, bringing lightness and rhythm to the surface. Together, they expand the collection with a new dialogue between structure and colour, adding dimension and vitality to every piece.

Rialto ECO is a snuggly yarn with a lofty hand feel and a lively appearance. Precious RWS extrafine merino wool fibres are twisted with a finer count of cotton, creating a dance with light flecks of colours that decorate the surface of this beautiful yarn.

Terrazzo ECO takes its name from the popular Italian flooring material. With a similar organic appearance, Terrazzo ECO is a great transseasonal yarn that has the perfect balance of warmth, softness and colour.

Carnival ECO is a colourful new yarn that embodies the joyful energy of the winter season. Crafted from a captivating blend of premium wool, cotton and recycled nylon, this yarn infuses knitwear with a vibrant and playful aesthetic. The dynamic colour palette and textural elements create a sense of relaxed luxury, elevating any garment or accessory with a visually striking look.

Yulunga ECO is a warm yarn with a slightly rustic aspect and a unique space dyed effect, an ideal combination for garments that are warm, comfortable and visually captivating.
