CASHMERE PURE

Cashmere Pure is one of our most precious yarns with a luxuriously soft hand feel. Our skilled technicians use traditional mule spinning to turn the fibres into a yarn with superlative qualities, giving you all the exceptional softness, lightness and warmth that you expect from this noble material. We test our cashmere fibres for purity at an independent laboratory so that you can rest assured that UPW® cashmere pure is...pure!

Cashmere Pure Undyed draws out the natural, raw beauty of pure cashmere. Free from dyes and chemical treatments, UPW® maximally preserves the natural hue and texture of cashmere fibres, bringing us back to the roots of nature.

Pure Donegal is a luxurious subtle nep yarn that uses the same fibres as Cashmere Pure. The unique colour patterning of the neps adds a unique character and style to the fabric.

Cashmere Pure

Exceptionally soft, lightweight, and warm — cashmere is among the world’s most coveted natural fibers.

“China is the world’s leading cashmere producer, supplying 70% of the global total.”

We source from goats in Inner Mongolia, where the finest cashmere grows as a dense undercoat against the bitter cold. Produced in limited quantities, each batch of raw cashmere is carefully collected, combed, and selected to retain cleaner, finer fibers for refined high-end yarns.

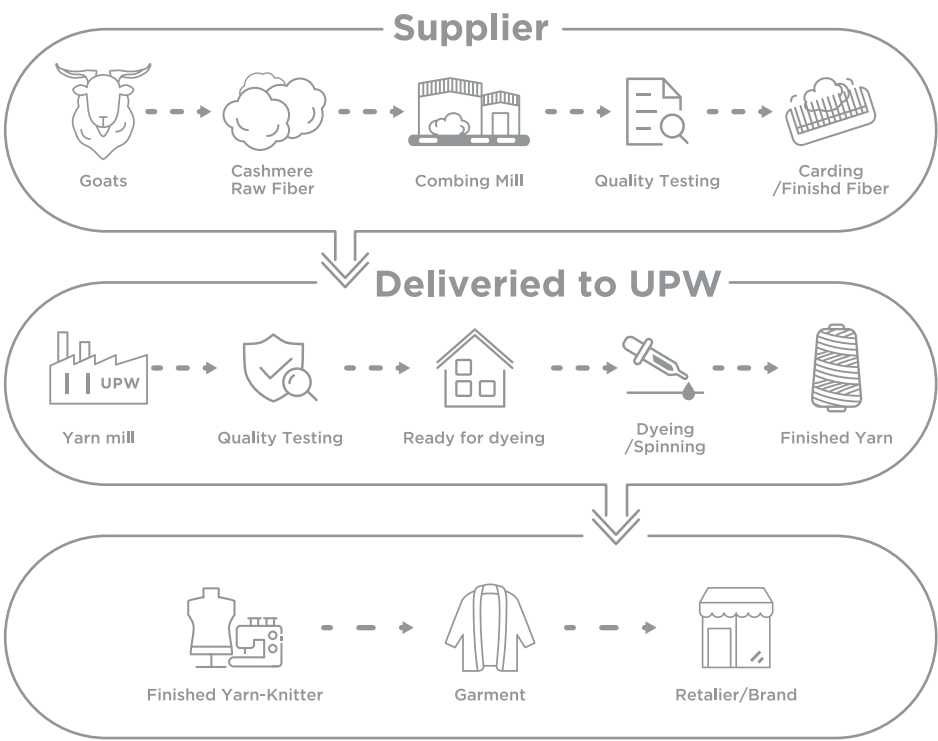

Traceability

Each batch of raw cashmere fibers can be traced back to the farm before classification and sorting.

We meticulously record the origin of every batch of cashmere fiber.

After classification and sorting, the cashmere fibers can still be traced to four specific regions (Xilin Gol, Chifeng, Bayannur, Erdos) in Inner Mongolia, China.
