FALL WINTER 2027

VELLUM

FOCUS COLLECTION

HEATH+

STAMFORD ECO

AORAKI ECO

VELLUM

This collection takes its name from **Vellum** — a material defined by its quiet refinement and subtle surface depth. Much like the yarns within it, it speaks to a balance between natural irregularity and controlled finish, where texture is present but never overwhelming.

Built around fine gauges and carefully considered fibre blends, these yarns reveal a soft, tactile richness through slub, marl, and flecked effects. The surfaces feel alive yet composed, allowing the character of each fibre to emerge with clarity and ease.

This season, we introduce **Heath⁺**. Inspired by open landscapes where tones shift gently across the ground, Heath⁺ carries a dry, fibrous texture with a softly mottled surface. Its natural irregularity brings depth and movement to knitwear, making it ideal for pieces that feel both grounded and quietly expressive.

Stamford ECO is a yarn spun from top quality RWS extrafine merino wool and silk noil. With its handspun appearance and light flecks of silk, Stamford ECO is a signature yarn that will add a unique touch to any item of knitwear.

Aoraki ECO is spun from a unique blend of premium wool and cotton fibres to create a beautifully balanced and versatile yarn. Its innovative construction technique results in a dynamic, sophisticated colour marling effect that adds a striking visual appeal to any knitwear item. This yarn is ideal for lighter winter garments or transitional items, as it seamlessly combines the warmth and durability of wool with the soft, breathable qualities of cotton.
