SEDIRA

Named to evoke a quiet sense of layering and material depth, **Sedira** reflects surfaces that feel built rather than applied. Colour, fibre, and structure settle into one another, creating a soft complexity that reveals itself gradually.

Nodus⁺, from the notion of a knot or point of connection, explores texture through clustering and density. Its looped, tactile surface adds dimension and irregularity, perfect for garments that highlight structure and surface in a more expressive way.

Kern ECO draws from the idea of the core—something grounded and essential. Its heathered surface holds colour within the fibre, creating a layered, mineral-like depth that lends itself to elevated, everyday pieces with quiet complexity.

Eske ECO is a beautiful yarn with a chunky, loosely spun appearance, an inviting hand feel and a lightly speckled donegal surface. Ideal for classic items of knitwear, this yarn will add a touch of colour and personality to any wardrobe. Eske ECO is a 3 gauge yarn spun from RWS extrafine merino wool with a touch of alpaca and recycled nylon.
