FALL WINTER 2027

CROFTER ECO

CORE COLLECTION

CROFTER ECO

CROFTER+

CROFTER ECO

Crofter ECO is a luscious nep yarn with a rounded roving look and a super soft hand feel, ideal for gorgeous chunky knitwear with a true donegal appeal.

Crofter ECO is also available in the **‘Plus’** version with RAS alpaca for a more sustainable option. Minimum order quantities apply.

Responsible Animal Fiber (RAF)

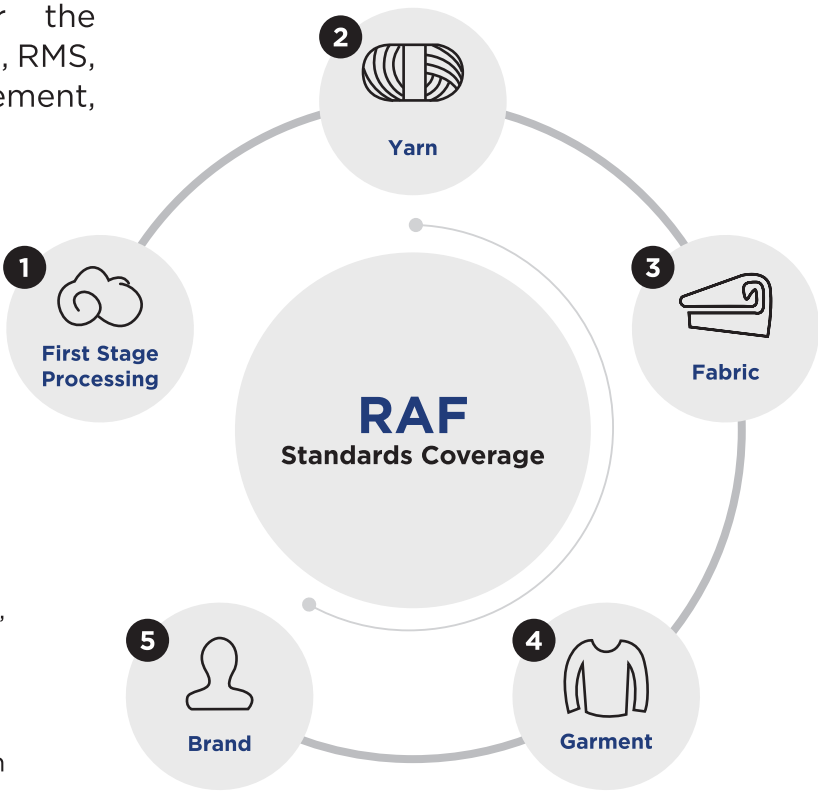

UPW® works with materials certified under the Responsible Animal Fiber standards, including RWS, RMS, and RAS, supporting animal welfare, land management, social responsibility, and supply chain traceability.

Responsible Animal Fiber Standards Framework

Farm Scope:
Farms are certified against animal welfare, land management, and social welfare requirements.

Supply Chain Scope:
All processing steps must be certified to make sure the chain of custody is maintained to the last level of production.

The Responsible Animal Fiber (RAF) standards framework covers the Responsible Wool Standard (RWS), Responsible Mohair Standard (RMS), and Responsible Alpaca Standard (RAS). Guided by the Five Domains of animal welfare, it focuses on nutrition, environment, health, behavior, and positive mental experience, supporting more transparent, responsible, and sustainable animal fiber supply chains.

Since obtaining RWS certification in June 2019, UPW® has continued to promote the use of responsibly sourced wool and strengthen traceability management from raw material sourcing to product delivery. Since 2024, all wool used in UPW® yarn collections has been RWS-certified, further enhancing material transparency and supply chain credibility.
